What is the role of SIAA?

The SIAA is a national organisation formed to promote the growth of the Australian space industry. We speak with authority and credibility on behalf of our members on policy and commercial issues connected with the Australian space industry.

What services are provided?

The SIAA has a leading role in advising government on behalf of the space industry. With the establishment of the Australian Space Agency there has never been a more crucial need to have a strong national voice for the space industry.

- We provide avenues for networking and collaboration amongst our members. We hold meetings and events across Australia, engaging with our members to devise and communicate policies that support the development of the Australian space industry.
- We actively promote and facilitate commercial, industrial and research opportunities for our members nationally and internationally.
- We advocate on behalf of the industry, harnessing the skills and expertise of our membership to address issues of common concern to corporations, businesses and individuals involved in, or seeking to become involved in, the space sector nationally and internationally.

By adding your support, SIAA can represent your views and provide you with expertise and advice relevant to your business development needs and concerns. Can you afford **not** to be a member? Join us today!

What is the scope of the Australian Space Industry?

The space industry in Australia consists of organisations and individuals involved in the provision and use of space related technologies or services. These technologies and services include the following:

- Telecommunications and video distribution via satellite
- Remote sensing
- Environmental monitoring and meteorology
- Satellite development
- Satellite components and sub-systems
- Ground systems for space technology
- Positioning, navigation and timing systems
- Space science
- Space exploration
- Space education
- Professional services to support the above (consulting, legal, financial, insurance etc).

Who are SIAA's members?

SIAA's membership represents the diverse character of the Australian space industry. Our corporate, university, government and individual members include satellite operators, research institutes, aerospace contractors, defence and electronics suppliers, systems developers, spatial services experts, engineers, scientists, researchers, entrepreneurs, lawyers, policy and market analysts, insurance experts, financiers, consultants, university students and others.

Membership is open to all corporations, businesses, government agencies, educational institutions, entrepreneurs, consultants, individuals and young professionals involved in the space industry or with an interest in space and a desire to establish a strong and diverse space industry in Australia.
